PART-145

REGULATION TRAINING

WHAT'S IN IT FOR YOU?

Regulations and standards from ICAO, EASA, and the FAA form the basis of everything we do in aviation. In short terms: Everything and everyone must be compliant.

Having intricate knowledge about the content and implications of these regulations enables staff to navigate efficiently and ensures proper implementation in a cost-effective manner.

This course enables participants to:

- Navigate in the relevant Part-145 regulations and apply the appropriate regulations for the specific type of work and situation
- Keep up-to-date with proposed regulatory changes
- Apply working knowledge about the content of Part-145 regulations

COURSE CONTENT

Our regulation training course provides general information of EASA Basic Regulations - and a detailed look into relevant Part-145 regulations, including the associated AMC and GM. Upcoming regulatory changes will also be addressed.

The course explains the EASA amendment process including NPA and CRT. This is done through an interactive learning approach in which discussions of implementation and compliance are the focal point.

Please note that participants will benefit from having completed our Nominated Persons training prior to this course.

COMPLIANCE

EASA Part-145.A.30 states that personnel functioning as Nominated Persons must demonstrate working knowledge of Part-145 regulations.

TARGET GROUPS

Our competency-based Regulation Training is aimed at personnel working with or preparing to work in a Part-145 maintenance environment.

The following titles qualify for training:

- Accountable Manager
- Base, Line, or Workshop Manager
- Quality Manager, Quality Assurance Manager & Compliance Monitoring Manager
- Maintenance, Training, or Production Manager
- Deputies for the aforementioned titles
- Inspector & Auditor
- Other relevant personnel

You will receive a certificate upon completion.
